## **South River Technologies Drops Anchor at ISPCON 2005**

---

*SRT Products GroupDrive & WebDrive Will Be Featured*

Annapolis, MD – May 17, 2005 – South River Technologies (SRT) announced today their upcoming attendance at the ISPCON Spring show (May 24<sup>th</sup> – 26<sup>th</sup>) in Baltimore, MD in Booth #609.

SRT sales and marketing professionals will be on hand to explain the benefits of licensing their solutions to ASPs, ISPs and online storage providers. Using SRT solutions, ISP customers can connect to the ISPs storage server through a Windows drive letter. Users view and edit files in their assigned space as easily as they access files on their local computer.

ISPs also have the capability to extend their brand to the desktop with SRT's full re-branding options. The ISP is given the ability to embed their graphical identity directly into the product.

“Exhibiting at ISPCON will allow attendees to experience the benefits of licensing our technology,” claims Tracy Welsh, VP of Business Development. “ISPCON creates an opportunity for SRT to connect with potential partners and discuss solutions tailored to their specific needs.”

### **About South River Technologies**

South River Technologies, headquartered in Annapolis, Maryland, develops Internet file management software that is used for file collaboration, website management and shared access. SRT's unique client technology creates an instantly familiar interface by integrating seamlessly into the Windows Operating System. Founded in 1996, South River Technologies

directly sells and markets Windows based utilities and licenses its technologies to Independent Software Vendors and online service providers.
