South River Technologies Inks OEM Deal with Macroview

WebDrive Expands Coverage within Asian Market

Annapolis, MD – September 7, 2005 – South River Technologies (SRT) announced today that it has entered into an OEM partnership with China based Macroview Telecom Limited to license its WebDrive product. WebDrive allows users to securely access remote files through a virtual hard drive.

Macroview, a systems integrator that provides technology solutions to ISP's, performed extensive industry research to find virtual drive software for their customer. WebDrive was chosen based upon stability and performance, as well as the ability to provide Macroview's customer with a fully branded solution. In addition, Macroview assisted in the localization of WebDrive for the Chinese market.

“The WebDrive application is the core of the solution that we were able to present to our customer. WebDrive offers the high performance and stability that we require,” says Eric Lo, Senior Manager of Business Development for Macroview. “The ability to access remote servers through a virtual drive is a feature that has proven highly useful. We could not find all of these capabilities in any other product.”

About Macroview Telecom Limited

Macroview Telecom Limited is a professional provider of internetworking solutions for data, IP telephony, video, carrier backbones, security and network management for multinational enterprises, telecom service providers and government institutions since

1991. Macroview has been operating for 14 years and now has 6 offices located in Hong Kong (Headquarters), Guangzhou, Shanghai, Beijing, Shenzhen and Macau.

About South River Technologies

South River Technologies develops Internet file management software for file collaboration, website management and secure access. SRT's unique client technology creates an instantly familiar interface by integrating seamlessly into the Windows operating system. Founded in 1996, South River Technologies directly sells its product and licenses its technologies to software vendors and online service providers.
