South River Technologies Partners with WebSafe, Inc.

WebDrive Enhances WebSafe's Secure Document Management Service

Annapolis, MD – September 13, 2005 – South River Technologies (SRT) announced today that it has entered into a Reseller Channel partnership with U.S. based WebSafe, Inc. to distribute SRT's WebDrive software product. WebDrive creates a virtual drive allowing users to securely access remote files as if they were on their local computer.

WebSafe, a provider of secure Internet-based document management systems, will use SRT's WebDrive technology to enhance their user interface.

“While WebSafe was well satisfied with our browser interface, it was important to also provide a consistent interface for all applications,” explained Don Moore, Director of Business Development for WebSafe, Inc.

WebDrive's simplified user interface enables WebSafe users to have a drive letter pointing to their WebSafe folders. “It is much easier for [our users] to remember that drive ‘W:’ points to their WebSafe folders [rather] than a Web Folder shortcut because the mapped drive shows up when the user double clicks My Computer.” Moore went on to point out that, “this reduces training time and user frustration.”

About WebSafe, Inc.

WebSafe, Inc. provides a powerful and secure Internet-based document/file management service. Customers use WebSafe to store important information such as scanned images, word processing documents, spreadsheets, etc. on the servers located at the Southern Telecom Company's (NYSE: SO) co-location facility in Birmingham, AL and then are able to access that information via the Internet. To insure the highest level of security, WebSafe encrypts all information both in transit and while stored. “Keys” can be given to trusted users, allowing collaboration of designated folders without compromising security.

WebSafe also offers the ability to automatically backup critical information on a scheduled basis into the Customer's safe. Customers using WebSafe include small businesses, accountants, attorneys, banks, individuals, students and anyone who benefits from securing important information and the expanded access offered via the Internet. For more information about WebSafe, please call 205.414.1903 or visit <http://www.websafe.com/>.

About South River Technologies

South River Technologies develops Internet file management software for file collaboration, website management and secure access. SRT's unique client technology creates an instantly familiar interface by integrating seamlessly into the Windows Operating System. Founded in 1996, South River Technologies directly sells its product and licenses its technologies to software vendors and online service providers.
